When my kids were little we went to the river a lot as many families still do. Not knowing that we were swimming in a river polluted with 185 different toxins. The wealthy industrialist that created this mess and now are grumbling that it will cost too much, probably go to the Bahamas for vacation. Please EPA hold them accountable for what they did. Do not put this on the taxpayers, tribal members, local citizenry, but on the shoulders of the ones that perpetrated this. Make them clean up Willamette Cove and Alder Creek and all the other places on our beautiful river. Let the native american tribes, the local Hmong and Islanders that fish daily and eat the fish have good fish to eat again. Choose Alternative G. The one alternative that tries to really fix the problem and will give us back the river in hopefully our lifetime.
